- ✓ Creation of pivot tables
- ✓ Dynamic data mining through detail viewing

## SHARING ANALYSES

- ✓ Web visualization of interactive dashboards  
from a web browser
- ✓ Centralized backup on the TIBCO library
- ✓ eeeeeee

## THE BENEFITS

- ✓ Aggregate your workshop data with your company data
- ✓ Automate the production of your key indicators and make analysis and decision-making easier
- ✓ Benefit from a single interlocutor and from the QUASAR expertise to create your industrial performance indicators

## THE BENEFITS OF B.I. FOR THE COMPANY

B.I. is an improved version of Excel. The B.I. allows for many more interactions with the data. It is possible to zoom in on graphs and go deeper : for example, by clicking on the turnover, you can have the detail of each customer up to the invoice line, or even lower, and all this in a dynamic and user-friendly way.

The purpose of B.I is to be connected to several information systems simultaneously in order to have a transversal vision of all the company's data. It is a great tool for analysis and communication.

## TIBCO SOFTWARE AND QUASAR PARTNERSHIP

QUASAR Solutions integrates the TIBCO Spotfire BI software with the partnership of TIBCO Software Inc., a US-based provider of real-time data management and cloud computing solutions.
