

DOCUMENT MANAGEMENT

The QS-GED module allows you to store and access all your data (plans, procedures, standards, etc.) on our collaborative and secure DMS platform. Connectors are set up to interact with all the modules of the QUASAR MES Suite as well as with your business-specific software.

STORING YOUR DOCUMENTS

- ✓ Edit documents directly
from the web interface
- ✓ Automatic update of documents
related to your activities
- ✓ Customizable storage structure and management policies
- ✓ Search engine within the documents
- ✓ Subscription to events and notifications
- ✓ Event log to know everything happening on the platform
- ✓ Database in web or client-server hosting
- ✓ Role and user management

SETTING UP AN INTEGRATED DMS

The Document Management System integrated into your QUASAR modules provides significant benefits in terms of quality, productivity and lead times.

Thanks to immediate movement, processes and collaborative work are significantly optimized. Users no longer waste time searching for documents, disseminating them, checking that they have been validated and that they are up to date. The Return on Investment (ROI) of a well-managed DMS project is only a matter of weeks.

THE BENEFITS

- ✓ Centralize all your documents related to your roles and tasks
- ✓ View your processes, procedures or regulations in just a few clicks
- ✓ Limit multiple documents with
the latest updated versions
- ✓ Share your information in a more safe and easy way

9 MODULES TO MEET THE M.E.S NEEDS IN YOUR COMPANY

Initially expert in quality control and production management, QUASAR has progressively extended its functional scope to offer today a comprehensive M.E.S offer. Store all your production data in a single system linked to the company's information system (ERP, PLM, CMMS, etc.). Its wide range of features makes it a progressive and flexible tool that can easily be adapted to meet your company's needs.
