

A black and white photograph of industrial machinery, showing various metal components and a drill bit.

MANAGEMENT OF NONCONFORMITIES

The QS-nc/ac module allows you to monitor and manage non-conformities and corrective actions of internal or external products. It is based on a continuous improvement approach. This allows the user to report non-conformities and manage 8D action plans. Thanks to these elements, the application ensures the system component of your company's quality policy.

NONCONFORMITIES

- ✓ Declaration form, operating procedure configurable according to the user
- ✓ External (customer or supplier) or internal non-conformities
- ✓ Management of costs and associated compensations
- ✓ Links to associated documents

WEB FEATURES

- ✓ Entry, modification, balance/printing declarations of non-conformity
- ✓ Monitoring of ongoing actions
- ✓ Management of a complete workflow with validation steps
- ✓ E-mail and alert management

THE BENEFITS

- ✓ Monitor the evolution of production non-quality
- ✓ Undertake corrective and preventive actions and analyze their effectiveness
- ✓ Reduce non-quality costs

ACTION PLANS

- ✓ Curative or preventive management
- ✓ Dynamic status of actions
- ✓ Management of reminders on due dates
- ✓ 8D Methodology

QUASAR & MOBILITY

Several web features are available in different modules of the QUASAR Suite. The technology used ensures the software is compatible with various media (PC, PDA, tablet, etc.).

WORKFLOW COLLABORATIVE MANAGEMENT

QUASAR integrates the workflow system to define a process with successive steps either sequentially, according to a value entered, or in a loop until a condition is met. The sequence description uses AND, OR or LOOP operators, with possible combinations. Sending emails, for example, can be integrated into a workflow to track and speed up certain processes, such as managing anomalies or alerts in the event of variations...

9 MODULES TO MEET THE M.E.S NEEDS IN YOUR COMPANY

Initially expert in quality control and production management, QUASAR has progressively extended its functional scope to offer today a comprehensive M.E.S offer. Store all your production data in a single system linked to the company's information system (ERP, PLM, CMMS, etc.). Its wide range of features makes it a progressive and flexible tool that can easily be adapted to meet your company's needs.
